

AEROTAC

Self-adhesive materials

*Choose and change your
style whenever you like*

**Ultra removable
self-adhesive materials
for wall decoration**

In designing living space, a fresh wind has blown. Now, the walls are less adorned and works of art are being replaced by more modern designs in the form of stickers and wall decals.

Aerotac wall decal programme is designed for the production of long term removable decorative labels for wall and furniture decoration. Aerotac wall decal materials can be used on walls, glass, furniture, floors and doors in all living and office spaces.

The AEROTAC WALL DECAL materials:

- **have long term removability and leave no traces,**
- **are repositionable.**

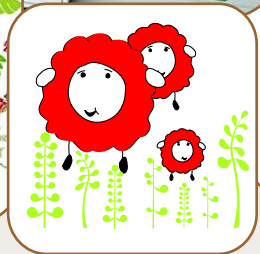

Aero offers three different materials for wall decoration, each having its own characteristics. The choice of face material depends on the applied press technique and the final use.

WALL DECAL PAPER 150 face material is an impregnated special nonwoven one-side coated paper made from cellulose and synthetic fibres. This face material is dimensionally stable and has a high vapour permeability, which prevents mildew and supports a healthy room climate. The material can be printed in different techniques: flexo, letterpress, offset and electrophotographic print. This material is especially suitable for high-quality wall decoration.

WALL DECAL OFFSET 150 face material is a white, woodfree bulky matt coated paper. The material can be printed in standard techniques: flexo, letterpress and offset printing. This material is suitable for middle-quality wall decoration in living and office spaces. Because of its lower price it is especially suitable for decoration of exhibition spaces, posters and for less demanding wall decoration.

WALL DECAL PVC 80 face material is a matt transparent cadmium and phthalate free PVC foil. This material is dimensionally stable but flexible enough to allow easy application. The material is thin, which ensures good bond to the wall and makes the edges of the graphic invisible. It is suitable for high-quality wall graphics.

GENERAL INFORMATION ABOUT AEROTAC

Aerotac self-adhesive materials bring solutions for different label applications: direct and indirect food contact, beverages, transport & logistic, office, retail, cosmetics, home decorations and consumer durables.

AEROTAC SELF-ADHESIVE MATERIALS
